### Storm Damage Sale from June 2022

### Harvest Area:

The majority of the sale area consists of wind storm damaged timber. Harvest all stems two inches and larger within the sale area. Utilization will be to a 4 inch top. Volume estimates are a rough ocular estimate of the storm damaged area and are expected to vary. Any needle tree species will be scaled as softwood. This is a mill ticket sale. Stick scale, on site, will be provided by Marinette County for any harvested forest products not going to a mill.
